

# SHIPPING WITH AVALON

This is an example of how we ship our products out, which is above and beyond the standard shipping process. We take great care to minimize if not eliminate freight damage. Since we adopted our new packaging system last year, we have experienced less than 1% damage. All boxes are labeled and tagged per opening.

# SHIPPING WITH AVALON

We layer our shipments with foam insulation to carefully ensure that we can avoid scratching and damage. Each box is packed complete with trim casings, corner connectors, clips and screws. Each box can be staged at an opening with all necessary components to complete that opening—no hunting for parts and pieces. You will also receive an email with a copy of the BOL, pictures of the pallets before they leave our location, and a packing list.
